Elias Mäkelä

Full-Stack Software Developer / Student @ Aalto University
Helsinki, Uusimaa, Finland

Summary

I'm a people-oriented full stack software engineer with experience working with technologies such as .NET, Typescript+React+Redux, and Python. Having started out as a self-taught programmer, I moved onto professional development at 15, with the help of some persistent and proactive job-seeking (i.e. lots and lots of cold emails!). My idea of great work is solving interesting problems with pleasant people, in an environment that supports learning and growth both professionally and as a person. Though my background is very software-oriented, I like to think of myself as a multi-disciplinary humanist who is interested in almost everything, with some of my main interests in addition to tech being communications and marketing. I also enjoy writing and reading philosophy.

Experience

Ignite

Accelerator Participant

June 2026 - August 2026 (3 months)

Espoo

One of the 6% of 200+ applicant teams accepted into Ignite.

Co-founder of Flou Health, where we're building a smart nasal wearable to help people breathe, sleep, and live better.

During the accelerator sprint I led development of Flou's health insights pipeline:

- Ideated and tested different sensor arrays
- Processed raw signals into physiology-informed features
- Evaluated the performance of different feature sets in machine learning to steer hardware development

Puolustusvoimat - Försvarsmakten - Finnish Defence Forces

Military Service

July 2024 - March 2025 (9 months)

Trineria Oy

Software Developer Trainee

September 2021 - January 2024 (2 years 5 months)

Helsinki sub-region

- Designed and developed an internal web app to support planning and prioritization of development.
- Containerized and deployed a full-stack application with Docker.
- Improved existing codebases and implemented new features for customer projects in collaboration with our team.

Trineria Oy

Junior Software Developer

June 2021 - July 2021 (2 months)

Helsinki sub-region

- Worked as a summer trainee, transitioning from self-taught development to professional Agile workflows.

Education

Aalto University

Bachelor of Science - BS, Information Networks · (August 2025 - June 2028)

Hyvinkään Lukio

Finnish Matriculation Examination, General Studies · (August 2021 - June 2024)
